SUMMARY

Experienced Software Developer with a strong background in building, enhancing, and maintaining enterprise web applications. Recognized for delivering scalable, high-quality solutions through strong technical expertise, analytical thinking, and effective collaboration. Committed to developing innovative software that improves business operations and creates meaningful user experiences.

PROFESSIONAL EXPERIENCE

IT Resources Corporation - Makati City, Metro Manila Philippines

Software Developer

Nov 2022 - May 2026

- Developed, and maintained scalable web applications using Java Spring MVC with a focus on back-end development.
- Design and develop front-end interfaces for multiple pages, ensuring seamless integration with back-end functionalities through close collaboration with the development team.
- Collaborate with project managers, designers, quality assurance, and team members to understand project requirements and translate them into technical solutions.
- Build responsive, user-friendly front-end interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Optimized application performance, conduct debugging, and troubleshoot issues to ensure a seamless user experience.
- Conduct code reviews and contribute to team development efforts to maintain code quality and system architecture standards.

Projects

- **myFEATILinks:** Developed a user-friendly front-end system that can be used by the students, providing seamless access to essential resources such as University-related links, Health Check features, and Pass Control Logs.
 - **RDBL(Receipt, Disbursement, Bank and Logs):** A web-based system designed for managing bank cards, including credit and debit cards and more.
 - **OneiisysHub WEx :** A web-based system that help users with tasks like registering data, keeping track of records and getting technical support, all in one.
 - **OneiisysHub FEATI:** Developed a room management module with auto-generated QR codes for seamless room check-ins and check-outs, and created E-Wallet features to improve user convenience and transaction processing.
 - **WExTrack:** Designed and implemented a comprehensive system for ticket tracing and user management, including the development of the front-end interfaces for Shipment Delivery Tracking and Cash on Delivery Dashboards.
-
